

Extending Battery Life

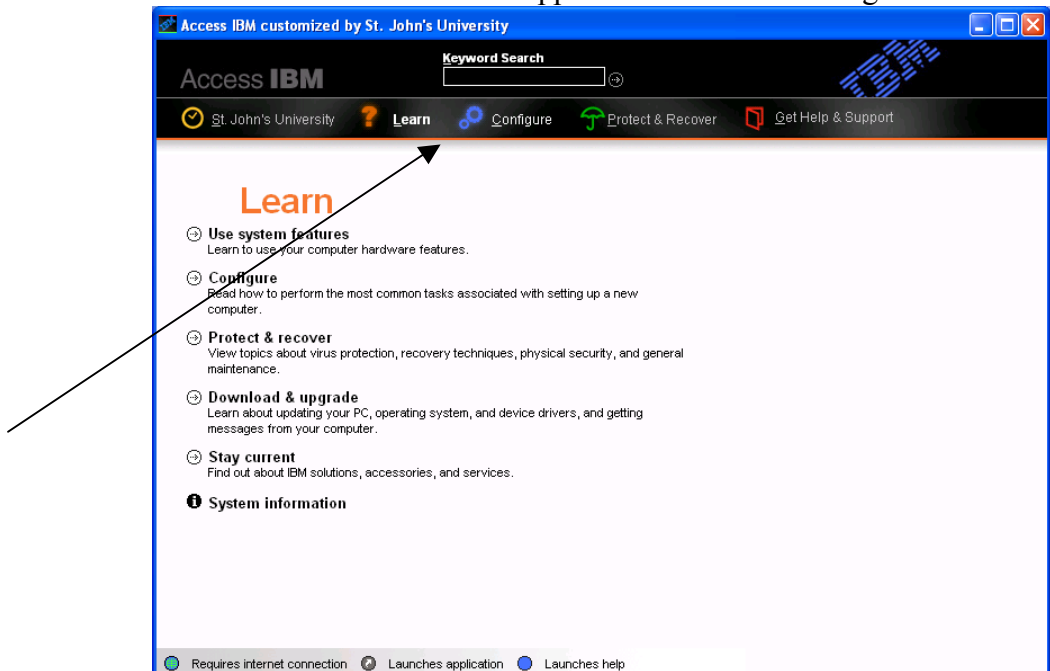

The instructions below will help you go through Access IBM to learn more about extending battery life. Access IBM is a valuable tool with an array of information available to you.

Extending Battery Life:

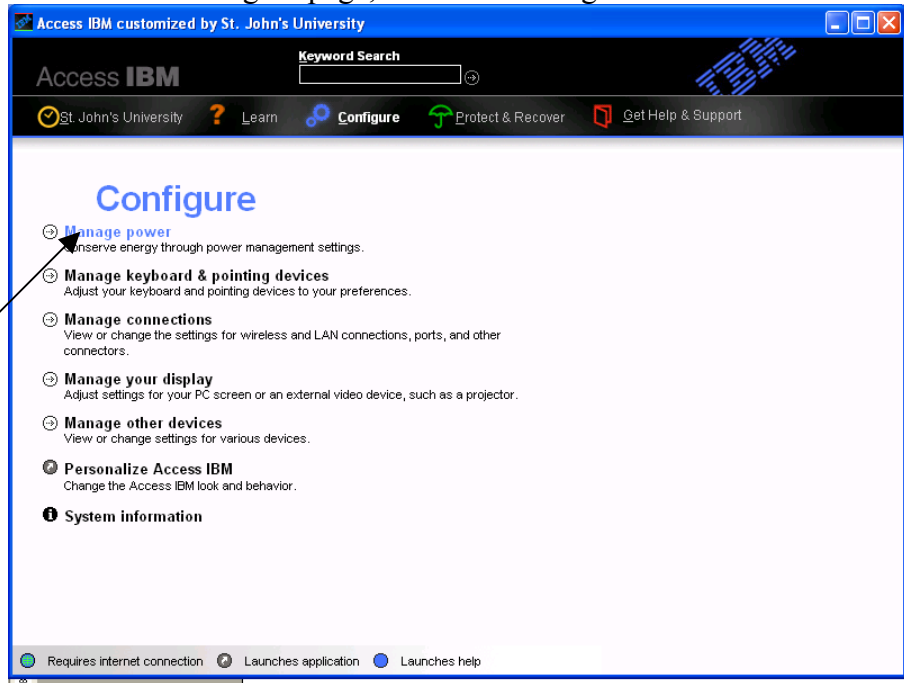

1. Press on the Access IBM button located on the upper left hand side of your laptop.

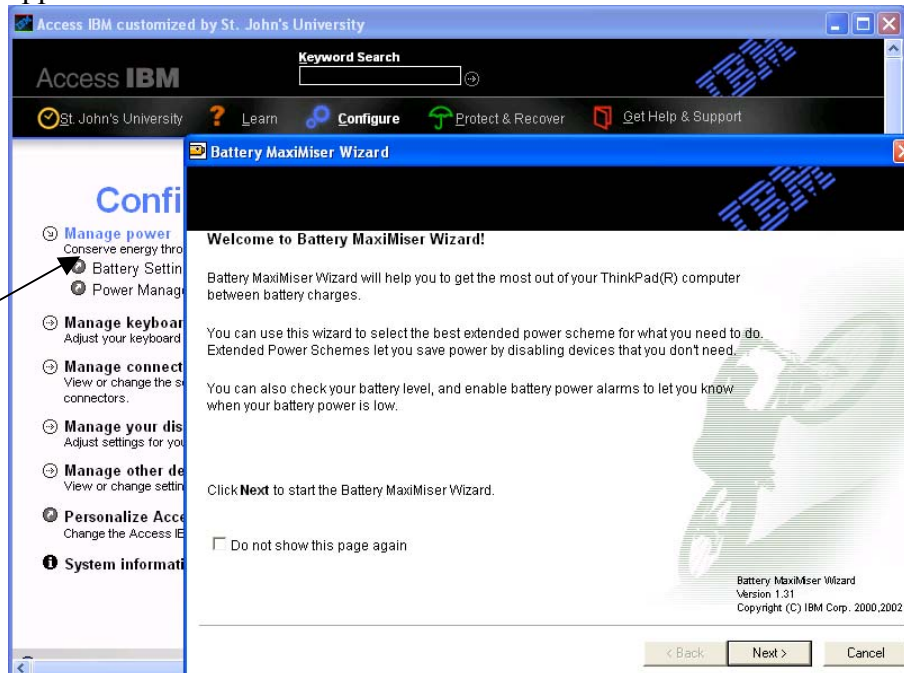

2. The Access IBM screen will appear. Click on the Configure Tab.

3. Once on the Configure page, click on “Manage Power”

4. Choose the Battery Setting link and the Battery MaxiMiser Wizard will appear.

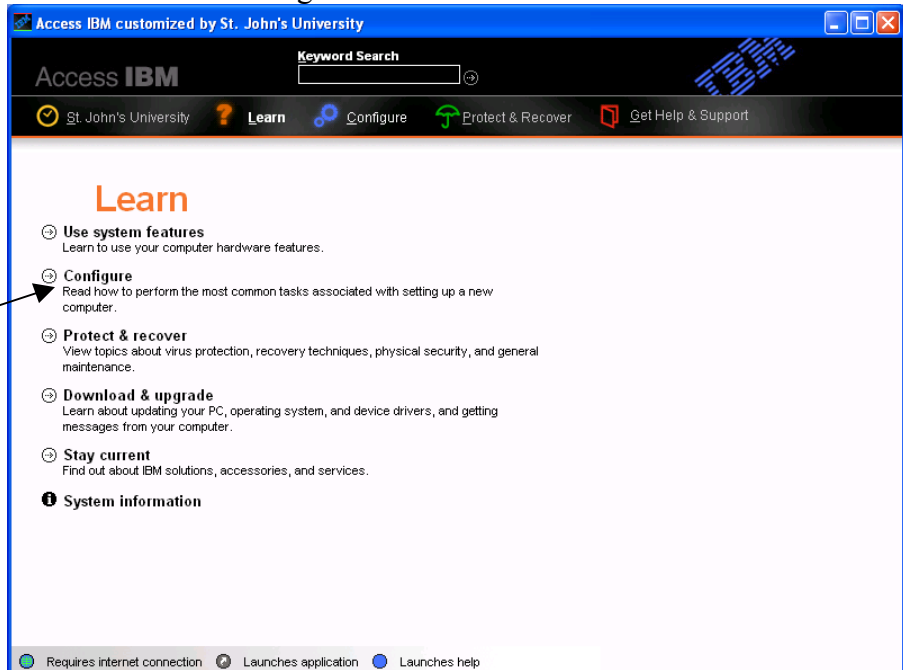

5. Follow the Maximiser directions and choose the settings that best suit you. This will help conserve energy on your laptop.

Learn more about Extending Battery Life:

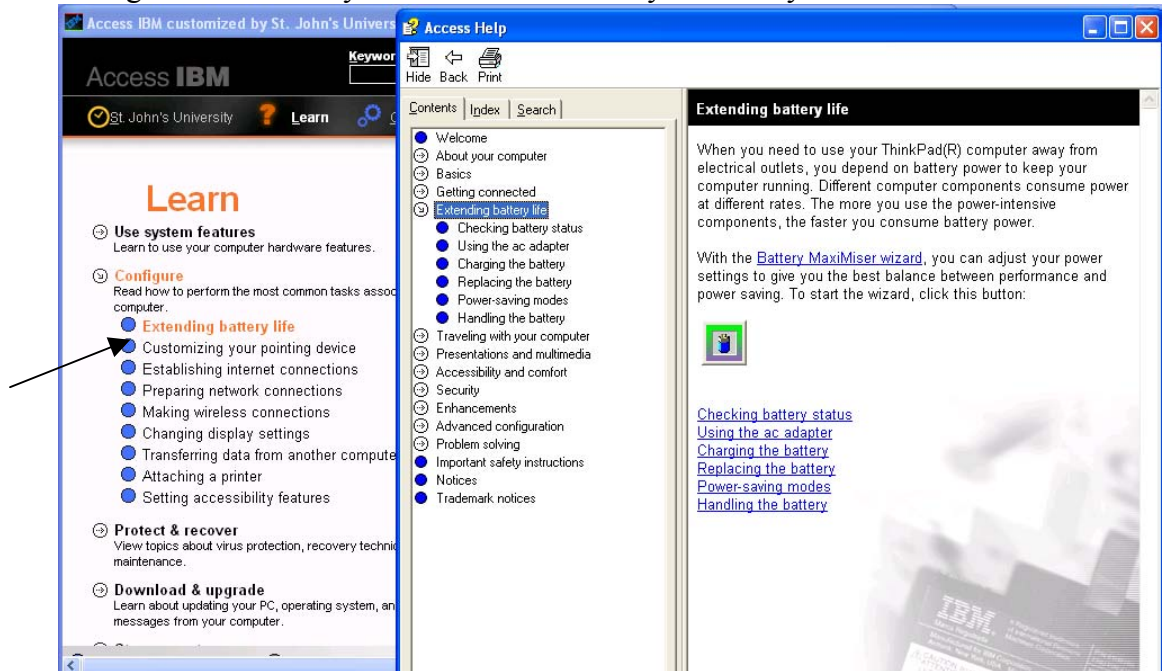

1. Press on the Access IBM button located on the upper left hand side of your laptop.

2. You will see this on your screen. You will already be on the Learn page. Please select the Configure Link

3. Choose the "Extending battery life" link. This will launch the Access Help setting and will allow you to read more about your battery.

4. Explore Access Connections to learn more about your laptop.
